

MANISH KRISHNA KANDRAKOTA

Hyderabad, India • +91 9440182135 • manish07070707@gmail.com
GitHub : <https://github.com/MANISH-K-07> • LinkedIn : <https://www.linkedin.com/in/manish-k-kandrakota/>

Education

Carnegie Mellon University Master of Science in Information Security The Information Networking Institute, CIT	Pittsburgh, USA 2026 - 2028
Sreenidhi Institute of Science & Technology Bachelor of Technology in Computer Science & Engineering GPA: 8.3 / 10.0 (Current; Expected Final ~8.5 / 10.0)	Hyderabad, India 2022 - 2026

Experience

RESEARCH & PUBLICATIONS

SphinxATS: A Multi-Attribute AI-based Decision Support System for Automated Resume Screening and Candidate Ranking
IEEE - ICSSAS 2026 | indexed in IEEE Xplore
<https://ieeexplore.ieee.org/document/11559449>

- Engineered a multi-criteria decision-making (MCDM) framework that replaces traditional keyword filtering with a configurable, weighted scoring algorithm.
- Developed an explainability layer using NLP techniques (TF-IDF, Cosine Similarity) to provide transparent, attribute-level ranking justifications and cluster-based hiring signals.

Charity with Clarity: Crowdfunding Using Smart Contracts
IEEE - ICRISST 2024 | indexed in IEEE Xplore
<https://ieeexplore.ieee.org/document/10921771>

- A Secure and Transparent Smart-Contract-Based Crowdfunding Model
- Designed and implemented a decentralized crowdfunding system (Ethereum + Solidity).
- With contributor voting, spending-request governance, and secure fund-release logic.

OPEN SOURCE CONTRIBUTIONS

Checkstyle — Java Static Analysis Framework (100+ merged pull requests)

- Contributed extensively to one of the most widely used Java static analysis tools
- Improved rule consistency, test coverage, documentation, and code quality.
- Recognized by maintainers for consistent, high-quality engineering contributions.

Projects (Available on GitHub)

Name	Description	Domain
CodeChecker	Java-based code linter with style and cyclomatic complexity checks	Program Analysis & Static Code Analysis
PyScope	A lightweight performance profiler for Python programs	Dynamic Program Analysis & Runtime Systems
SecureFlow	A static taint-analysis tool that detects when untrusted input flows into dangerous APIs.	Software Security & Vulnerability Analysis
NodeSync	Mini Fault-Tolerant Key-Value Store	Distributed Systems & Concurrency
Py2C	A mini Python-to-C optimizer, built from first principles	Compiler Design & Program Transformation
ModelTrace	A Research-Grade Framework for Inspecting, Debugging, and Stress-Testing Machine Learning Models	Machine Learning Systems & Model Interpretability

Honors & Awards

See Yourself in Cyber Scholarship

July 2026

National Cybersecurity Alliance (NCA) & ISACA Foundation

- Selected as **one of only 12 recipients** for a highly competitive scholarship recognizing students with strong potential for professional growth, technical excellence, and future leadership in the cybersecurity sector.

Technical Skills

- **Languages:** Java, Python, Solidity, C++, JavaScript
- **Systems & Tools:** Linux, Git, Docker, Maven, CI/CD, Flask, Scikit-learn, Pandas
- **Core Areas:** Software Security, Scalable Systems, Applied Machine Learning, NLP, Smart Contracts & Governance Models, Business English (Pearson Certified)

Technical Writing

- Author of technical blogs on systems, security, and software engineering
